This project is funded by the Norwegian tipping foundation "Health and rehabilitation" (ExtraStiftelsen Helse Rehabilitering).

ISAAC Norway is an international member organization, which goal is to augment communication abilities for children and adults with severe disabilities.

About the project

- The project "digjobb.no" (2017-2020) aims to provide accessible and meaningful work for people with motor/communication impairments.
- Project participants can get different tasks. They get followed-up from professional supervisors employed during the project period.

Examples of tasks

- Translate school material and information leaflets to graphic symbols (AAC)
- Testing E-learning school material, games, web-sites and apps.
- Compose music with accessible technology

Digjobb.no

- A web-site is under development, where the target group and clients can meet and exchange work assignments and services.
- On Digjobb.no clients can meet users of assistive technology, and get help with their products during development and testing.
